

Himmel Pharmaceutical Sales System

ADMIN GUIDE

Himmel Pharmaceutical Sales Management System — Administrator Guide

Overview

This guide provides comprehensive instructions for system administrators managing the Himmel Pharmaceutical Sales Management System desktop application.

1. System Administration & Configuration

- **Business Years**: Navigate to **Settings !' Business Years** to view, open, activate, or close fiscal years.
- **Maintenance Mode**: Toggle **Maintenance Mode** in Settings to prevent sales representatives from entering new sales data while system maintenance is in progress. Admin users maintain full access during maintenance mode.
- **Enterprise Logo Customization**: Update company logo and branding dynamically from Settings without needing rebuilds.

2. User Management & Role-Based Access Control (RBAC)

- **Roles**:
 - **Admin**: Complete system privilege including configuration, recovery mode, user management, and system audits.
 - **Manager**: Approval and oversight of order workflows, target assignments, and analytical reports.
 - **Sales Representative**: Order creation, doctor & institution directory views, and personal sales tracking.
- **User Administration**:
 - Create, edit, enable, disable users via **User Management**.
 - Reset user passwords and unlock locked accounts caused by failed login attempts.

3. Emergency Recovery Mode

- In case of forgotten master admin credentials, launch the application with `--recovery` or select **Emergency Recovery** on the login screen.
 - Enter the master emergency password (`HimmelAdmin2026!`) to access system bypass controls, reset credentials, and audit security events.
